

Natural Cosmetics Standard

The NCS label certifies the use of organically grown raw materials, no GMO, no microplastics, no parabens, silicones and phtalates and environmentally friendly, recyclable packaging.

Ecogarantie

The Ecogarantie label certifies the use of organically grown raw materials, containing no enzymes of GMO and optimal biodegradability.

Nature Care Product

The NCP label certifies the use of organically grown raw materials, containing no enzymes of GMO, optimum biodegradability and recyclable packaging.

Certified Sustainable Business

Certified sustainable business management of the Association for Applied Business Ethics. Contrary to pure product certification, this label comprises the entire

company. In addition to ecological product requirements, the company's social and ethical orientations are certified.

Stop Climate Change

Stop Climate Change is the highest standard for extensive analysis and certification of CO₂. The label certifies the analysis of the entire enterprise regarding CO₂ emissions and complete transparency as far as the processes causing CO₂ are concerned. The analysis proves that our supplier hardly generates CO₂ emissions due to heating and electrical energy.

Better than the labels you already know

At Mies Verden we aim to do the best we can. And that even means outdoing the labels you've learned to recognise every day.
